CERTIFICATE OF ATTENDANCE

This acknowledges that

Issa Gueye

attended

Unlocking HPC Performance with AMD Tools & GPUs

4th to 6th of November 2026

Co-funded by the European Union

EuroHPC Joint Undertaking

EURO³

CASTIEL 3

EuroCC 3 has received funding from the European High-Performance Computing Joint Undertaking (JU) under Grant Agreement No. 101306701. The JU receives support from the European Union's Digital Europe Programme and Germany, Albania, Austria, Belgium, Bosnia and Herzegovina, Bulgaria, Croatia, Cyprus, Czechia, Denmark, Estonia, Finland, France, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Montenegro, the Netherlands, North Macedonia, Norway, Poland, Portugal, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Türkiye, and Kosovo.

CASTIEL 3 has received funding from the European High-Performance Computing Joint Undertaking (JU) under Grant Agreement No. 101306918. The JU receives support from the European Union's Digital Europe Programme and Germany, Spain, France, and Estonia.

Funded by the European Union. Views and opinions expressed are however those of the author(s) only and do not necessarily reflect those of the European Union or EuroHPC Joint Undertaking. Neither the European Union nor the EuroHPC Joint Undertaking can be held responsible for them.

Certificate of attendance in Unlocking HPC Performance with AMD Tools & GPUs

Issa Gueye has successfully completed a **12-hour course** introducing HIP and ROCm, OpenMP offloading, profiling basics, advanced HIP/OpenMP, GPU-aware MPI, performance portability frameworks, AMD profiling tools and latest utilities. The learner took part in the online course on **November 4-6, 2026**, gaining hands-on experience in AMD GPUs and CPUs for high-performance workloads.

Course content level:

Intermediate – Advanced

Topics covered:

- Port applications from CPU or other vendor GPUs to run on AMD GPUs.
- Understanding the ROCm SDK and what it provides
- What programming languages can be used for AMD GPUs (HIP, OpenMP, etc.)
- Optimizing and scaling GPU applications
- Communication packages including MPI, RCCL and rocSHMEM
- Profiling and debugging tools for AMD GPUs

This training equipped participants with the skills to efficiently exploit AMD GPUs and CPUs for high-performance workloads.

Course format:

- Online lectures, demos, and hands-on labs (12 hours total).

Lectures taught by:

Bob Robey & Giacomo Capodaglio & Johanna Potyka & Luka Stanisic & Umesh Seth & Shelby Lockhart & Nico Bombace & Gina Siaraman. (AMD team)

Hands-on labs:

Conducted on [**AMD Accelerator Cloud**].

Organized by:

AMD & CASTIEL Project & NCC France.
